

# Safety cage ladder for access to the upper floor

Aluminum profile 65 x 25 mm safety cage ladder for access to the upper floor.

- Height to serve: 5 300 mm.
- Safety gate on ladder top to ensuring operator safety on the floor.
- Specific reinforcement to connect the safety cage ladder to the wall
- Anti-slip square rungs 25 x 25 mm

The achievement is perfectly adapted to the existing environment (respect of storage area, pipe passage and cutting of the grating bearing).
